PROFESSIONAL SUMMARY

Detail-oriented Operations and Data Analytics professional with strong skills in data interpretation, operational reporting, SLA management, problem-solving, process improvement and workflow coordination. Proficient in Microsoft Excel, SQL, and data visualization tools to transform operational data into actionable insights, data-driven decision-making.

SKILLS

Operational reporting; Microsoft Excel; SQL; Power BI; Data Cleaning; Data Visualization; Data Validation; Operations Coordination; KPI Tracking; Dashboard Creation; Reporting & Insight; Communication; Project Management; Data analytics.

PROJECTS

Network Rehab Operations Performance Analysis: Developed operational dashboards and analyzed network rehab data to monitor performance, identify pending work, and track completion trends across multiple zones. Enabled data-driven decision-making and supported timely completion of rehabilitation activities.

Website Traffic Analysis Project: Analyzed website traffic data to evaluate acquisition channels (Organic, Direct, Referral, Social, and Paid), identified user behavior and performance trends, and provided actionable recommendations to improve website engagement and optimize marketing strategies.

Customer Data Analysis: Cleaned, standardized and examine large, inconsistent datasets using Google Sheets, created insightful reports, and identified business trends, enabling non-technical stakeholder to interpret and data-driven decisions.

EXPERIENCE

HMT Commander (Network Rehab Operation and Report Analysis) | Bharti Airtel
(July 2025 - Present)

- Manage operational reporting for one Delhi/NCR cluster covering five operational zones across 5 Area Managers and 100+ RSUs.
- Develop Excel dashboards providing Area manager and Team Lead a clear, up-to-date views of their Area Rehab progress, pending, and overdue network activities.

- Analyze ODF, ODF Sagging, FAT+OTB, Bundling and Sagging reports to identify pending work and completion trends.
- Track approximately 20,000 rehabilitation activities using Excel-based MIS reports.
- Performed data validation checks to catch inconsistencies and gap in performance.
- Conducted productivity and performance trend analysis to identify operational gaps and support process improvements.

HDO Engineer – Backend Operations Support | Bharti Airtel | Sep 2024 – Jun 2025

- Provided backend operational support for Team Leaders managing 20 Engineers and 20 Wiremen
- Maintained and monitored SLA tracking reports, refreshing complaint data every **2 hours** to provide real-time operational visibility.
- Prepared daily reports to monitor KPIs, pending requests, and engineer productivity.
- Coordinated with field teams, verified data accuracy and supported workload planning to improve workflow efficiency.
- Tracked SLA compliance, monitored aging service requests, and coordinated with field teams to ensure timely complaint closure.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) | Dr. A.P.J. Abdul Kalam University | (Aug 2016- Sep 2020)
Relevant Coursework: Summer internship on Big Data Analytics with Hadoop, Statistics and Pattern Analysis

CERTIFICATIONS

Data Analysis with Python authorized by IBM.
Big Data Analysis with Hadoop.
